## Summary

“Watch the little things; a small leak will sink a great ship” - Benjamin Franklin.

I am a passionate project manager certified by the Project Management Institute (PMI), Scrum.org and Google. My mission is to plan and supervise projects to ensure they are completed timely, within planned resources and budget.

I have more than six years of experience in customer service, administration and troubleshooting positions. This has allowed me to develop a strong sense of responsibility, organization and empathy towards the client and my colleagues.

I obtained my BA in History at the University of Valencia. City where I studied Spanish sign language interpretation. After years of working with clients, I decided to specialize in project management and obtain the professional certificate in project management from Google, the certified associate in project management (CAPM) from the Project Management Institute (PMI), and the Professional Scrum Master I (PSM I) certification from Scrum.org. Currently, I am studying the official master's degree in project management at the European University.

I'm always interested in hearing from former colleagues, managers, or just interesting creative people, so feel free to contact me if you'd like to connect.
